

## **ABSTRACT**

### **PLANER**

A debris collection container for a planer comprising a receptacle for storage of debris generated by a planer during its planing action and a connector which connects the receptacle to a planer and through which debris can pass from the a planer to the receptacle during use wherein the connector connects to the receptacle via a part spherical shaped section which curves the direction of travel of any air or debris entrained within it as it passes through the part spherical section. The part spherical section curves any airflow and any entrained debris through ninety degrees.
